Custom Imprinting on Alumicolor Products

Most Alumicolor products can be custom imprinted with your company's information for self-promotion giveaways or private label sales. We can also imprint information for YOUR customers' organizations – giving you an opportunity to sell large quantities of customized promotional products to your clients. Normal production time is 10-20 days from art approval. There is a minimum of 50 pieces of each product/color. Please call our customer service department for details at 1-800-624-9379.

Alumicolor® Ordering Information

To Order

Phone: 800-624-9379 or 970-204-4200

Fax: 970-282-7100

Internet: www.alumicolor.com

Email: alumicolor@alumicolor.com

Alumicolor® Quality

Alumicolor® products are made from the highest quality extruded aluminum. The extrusion process creates rulers and scales with smooth edges to exact specifications. The Alumicolor® photo anodizing process makes the finish, the color and the calibrations a permanent part of the aluminum. Calibrations are resistant to cleaners or solvents. The anodizing process also means no ticks, raised surfaces or grooves to interfere with the creation of accurate plans, drawings and other precision work.

Alumicolor® products are made in El Salvador, and assembled and distributed in the U.S.A. Magnifying Rulers are made in the U.S.A. L-Squares are made in China.

Customer Retail Orders

Alumicolor® products can be purchased at fine art and drafting stores, many university book stores and other retail outlets. To find the distributor nearest you, look on our website - www.alumicolor.com - and select the **Store Locator** link. If your local outlet doesn't carry the product you require, just ask them if they will order it for you.

All catalog prices are list prices, some retailers may sell for less.

Distributor and Store Orders

- Minimum order \$100.00 Net (no minimum per item).
- Orders under \$500.00 Net are F.O.B. Fort Collins, CO.
- Orders over \$500.00 Net receive free ground freight in the Continental US.
- Orders will usually be shipped complete within 5 working days.
- All products are packaged for display with UPC codes.
- Substitutions for another color may be made for out-of-stock items.
- Items may be back ordered unless arranged in advance.
- Prior authorization is required for all returns.
- Claims for shortages must be made within 3 days of receipt.
- Prices are subject to change without notice.
- Net 30 day terms are available with approved credit.
- \$25.00 returned check fee may be applied.

Alumicolor® 6" & 15cm **Pocket Scales** are a smaller version of the 12" professional solid scale. The pen-size, light weight design provides professionals and students with a scale that can be taken anywhere. Architect, Engineering and Combination versions are also available with clip.

Use one of our Point of Purchase displays to increase your sales of these best sellers. Our Canister display holds 28 scales. Our Box Display holds 35 scales and is more versatile as it can either sit by the register or hang from a peg board. Choose the standard option of a mix of our most popular colors of Architect, Engineer and Combination scales or choose your own mix.

Alumicolor® Solid and Color Coded Drafting Scales

Alumicolor® scales are made from extruded aluminum with photo anodized calibrations that resist wear or being removed with solvents.

Solid Scales have an executive look and feel and are widely used by drafting professionals. Our standard Architect and Engineer versions are now available in all seven colors we offer.

Color Coded Solid Drafting Scales have a different color coded groove on each side (red, green, blue) easily identifying your most frequently used calibrations.

Alumicolor® Select-a-Scale and Drafting Fan

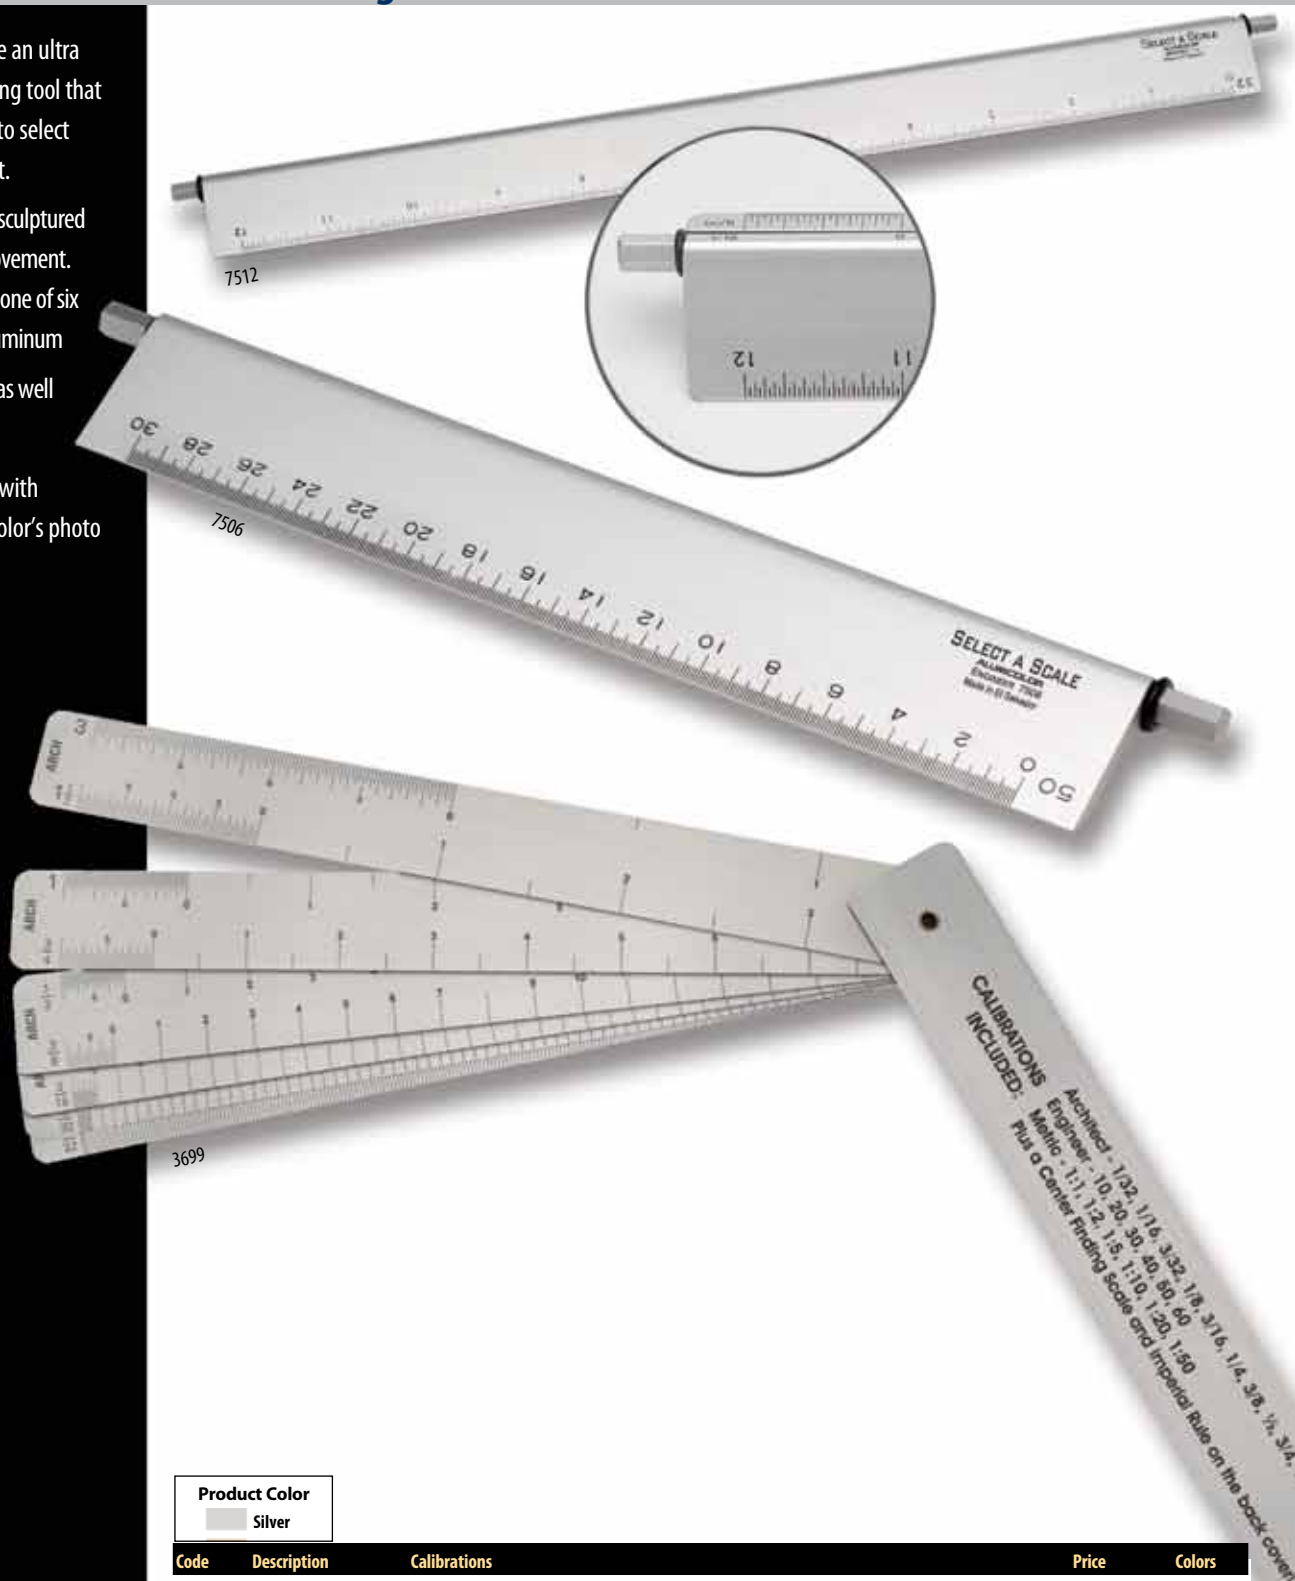

Alumicolor® **Select-a-Scales** are an ultra convenient and functional drafting tool that allows architects and engineers to select multiple scales all in one product.

The unique design incorporates a sculptured arch on the bottom for ease of movement. A rotating rod on the top displays one of six available scales while the solid aluminum base has fixed scales on the front as well as a raised inking edge.

Made from extruded aluminum with calibrations added using Alumicolor's photo anodizing process.

The Alumicolor® Drafting Fan

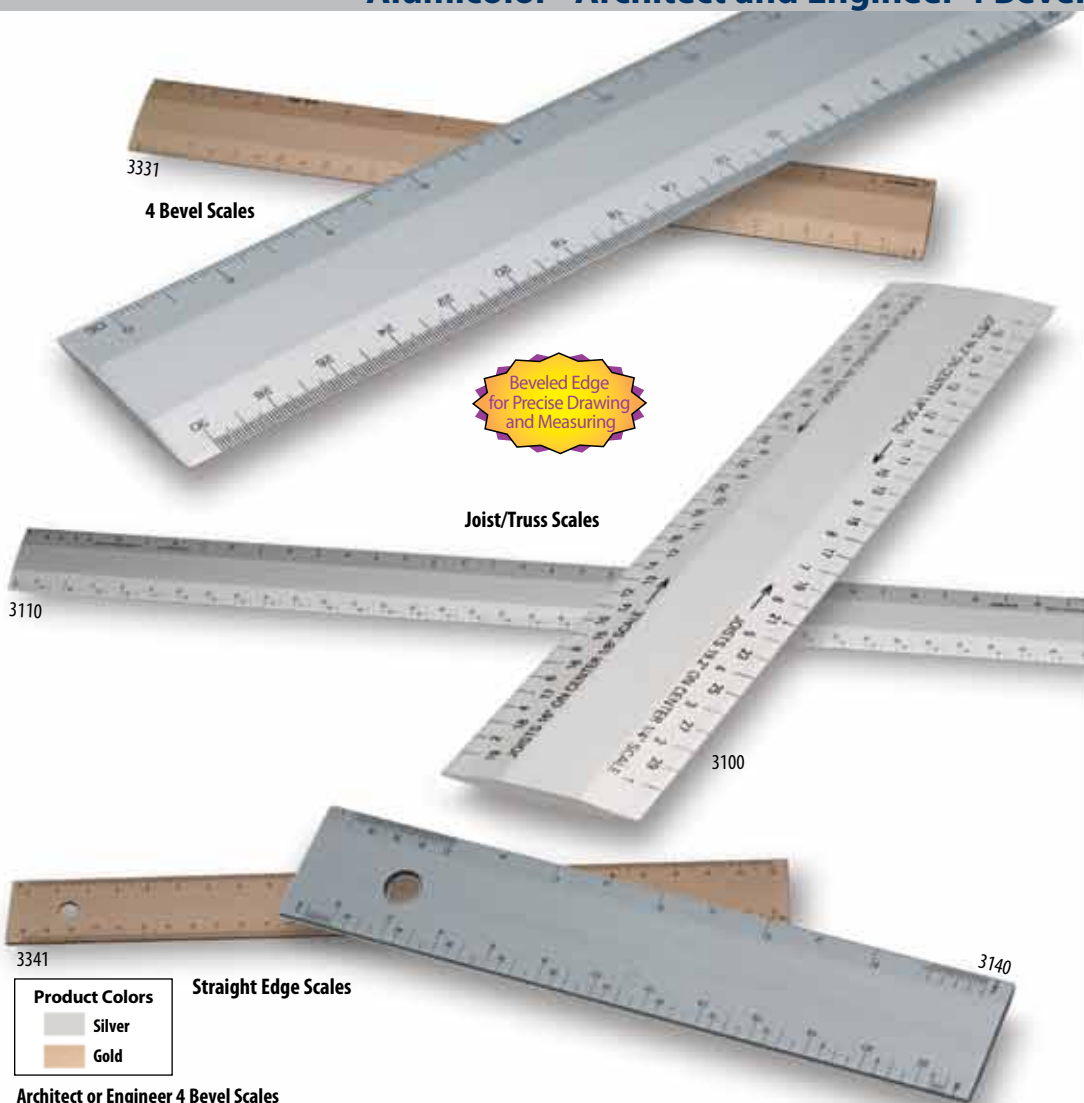

is another convenient all-in-one tool made from aluminum that has all standard Architect, Engineer and Metric scales used in the industry. 8 blades of aluminum sheet, riveted together giving you a compact tool with everything you need!

Alumicolor® Architect and Engineer 4 Bevel and Straight Edge Scales

Alumicolor® Architect and Engineer 4 **Bevel Scales** are precision measuring and drawing devices. Alumicolor's® photo anodizing process makes the calibrations a part of the aluminum providing a smooth, tick-free finish and markings that will resist wear and rubbing off.

Alumicolor® **Straight Edge Scales** are designed to carry in folders, notebooks or day-timers. An economical, high quality alternative to the 4 Bevel Scales.

Alumicolor® Architect **Joist/Truss Scales** are accurate, quality 4 bevel scales that will be a BIG hit with architects, builders, roofers, framers and lumber yards.

Based on customer needs, we are offering two different versions. Use the (1", 1/2") scales for measuring large scale drafting plans, whereas the (3/16", 3/32") scales are used more frequently for measuring reduced plans. Both versions come with (1/4", 1/8") scales.

Alumicolor® Standard and Non-Slip Standard T-Squares

Alumicolor's® **Standard T-Squares** have a 1-1/2" tempered aluminum shaft which is calibrated in inches and centimeters.

The black ABS plastic heads are lightweight and nearly unbreakable. The heads are secured with 5 screws instead of rivets. Available in a wide range of sizes. The aluminum shaft is made in El Salvador and plastic head is made in the U.S.A. Assembled in the U.S.A.

Alumicolor® **Non-Slip Standard T-Squares** have the same features of the Standard T-Squares. The Non-Slip T-Square has a neoprene non-slip backing that grips better than cork and will not dry out or chip off.

Alumicolor® has a full line of **Professional T-Squares** with a 2" wide extruded aluminum blade. Calibrations are made using Alumicolor's® photo anodizing process giving all our products a smooth, tick-free finish that will not wear.

Alumicolor® **Steel Edge Professional T-Squares** have dual stainless steel cutting/inking edges embedded in tempered aluminum shaft for heavy duty use. Alumicolor® **Non-Slip Professional T-squares** feature a neoprene non-slip backing that grips better than cork and will not dry out or chip off. All of our T-squares are calibrated in inches and centimeters.

Alumicolor® Standard and Professional Drafting Sets

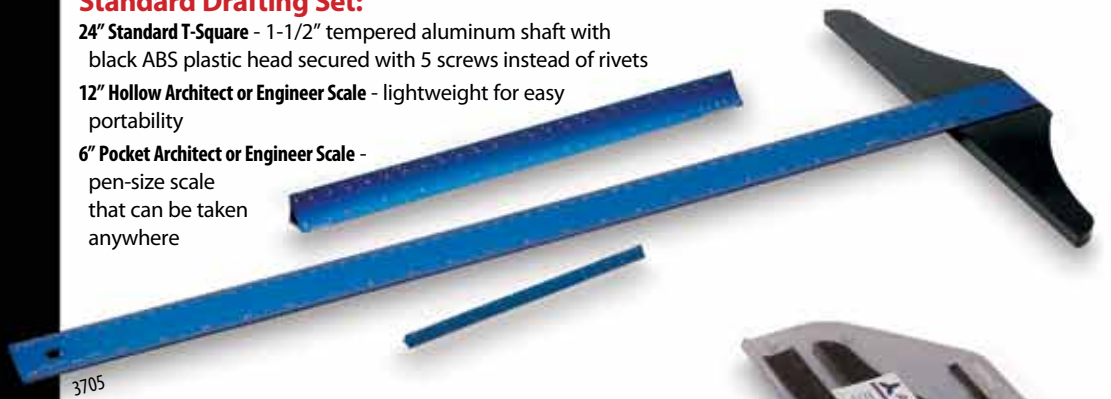

Alumicolor's® **Architect and Engineer Drafting Sets** combine key products in one easy-to-purchase, cost-effective package. All products are made from solid aluminum and calibrations are photo anodized. The anodizing process makes all markings a permanent part of the aluminum giving each product a smooth, tick-free finish that resists wear. A "must have" for students or professionals!

Standard Drafting Set:

24" Standard T-Square - 1-1/2" tempered aluminum shaft with black ABS plastic head secured with 5 screws instead of rivets

12" Hollow Architect or Engineer Scale - lightweight for easy portability

6" Pocket Architect or Engineer Scale - pen-size scale that can be taken anywhere

Engineering versions now available

Custom Standard Drafting Set:

24" Standard T-Square - Choose from 7 different colors!

12" Hollow Architect or Engineer Scale - Choose from 7 different colors!

6" Pocket Architect or Engineer Scale - Choose from 7 different colors!

Professional Drafting Set:

24" Professional T-Square - 2" wide extruded aluminum blade, channeled back, black ABS plastic head secured with 5 screws instead of rivets

12" Solid Architect or Engineer Scale - executive weight and feel

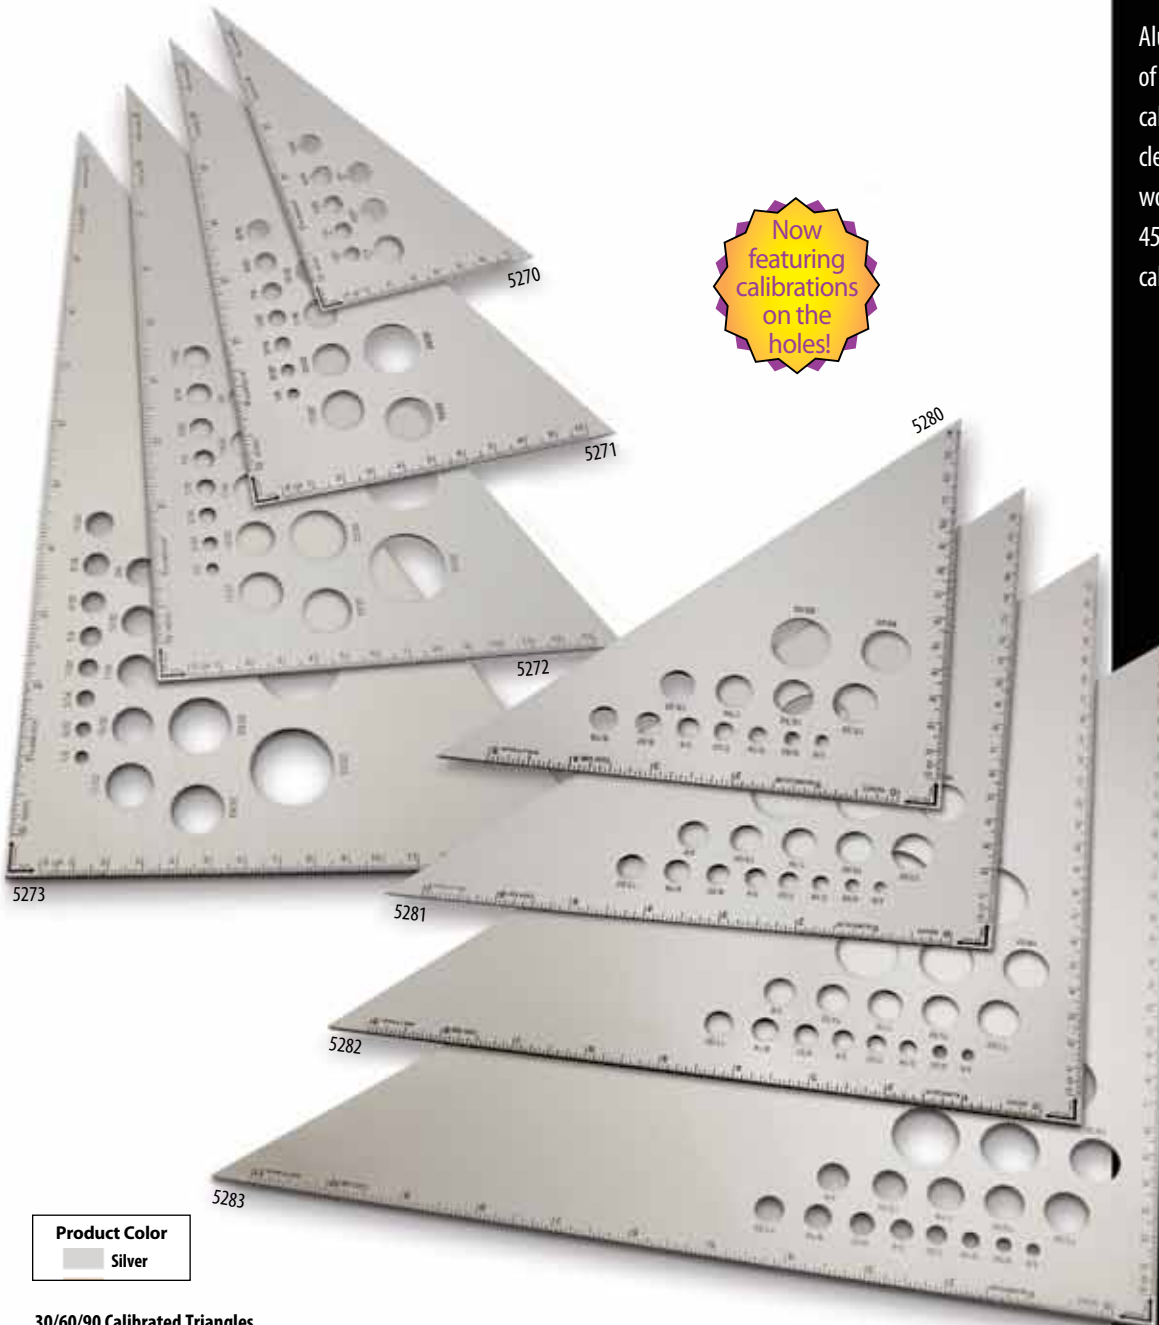

6" Pocket Architect or Engineer Scale - pen-size scale that can be taken anywhere

Alumicolor® Compass Ruler, Compass Point Sets and Magnifying Ruler

Alumicolor® offers **Compass Rulers** in 12" and 18" sizes. Compass Ruler sets include the shaft, anchor point, lead holder and lead all in one package. Make circles up to 24" with the 12" set or 36" with the 18" set.

As an alternative to the Compass Ruler, Alumicolor® also offers **Compass Point Sets** for use with your existing Alumicolor ruler or yardstick. Compass Point Sets include the anchor point, lead holder and lead for drawing circles, and a rotary knife for cutting circles. The straight edge size fits 6" to 24" rulers, code 1589 through 1594. The yard stick size fits 30" to 48" rulers, codes 1595 through 1598.

The 2 bevel **Magnifying Ruler** is calibrated in inches and centimeters with a 2X magnifier. The magnifier has a raised curve for viewing at a comfortable angle instead of having to look directly straight down. Made in the U.S.A. of a rigid, high quality plastic, it provides excellent viewing of small type.

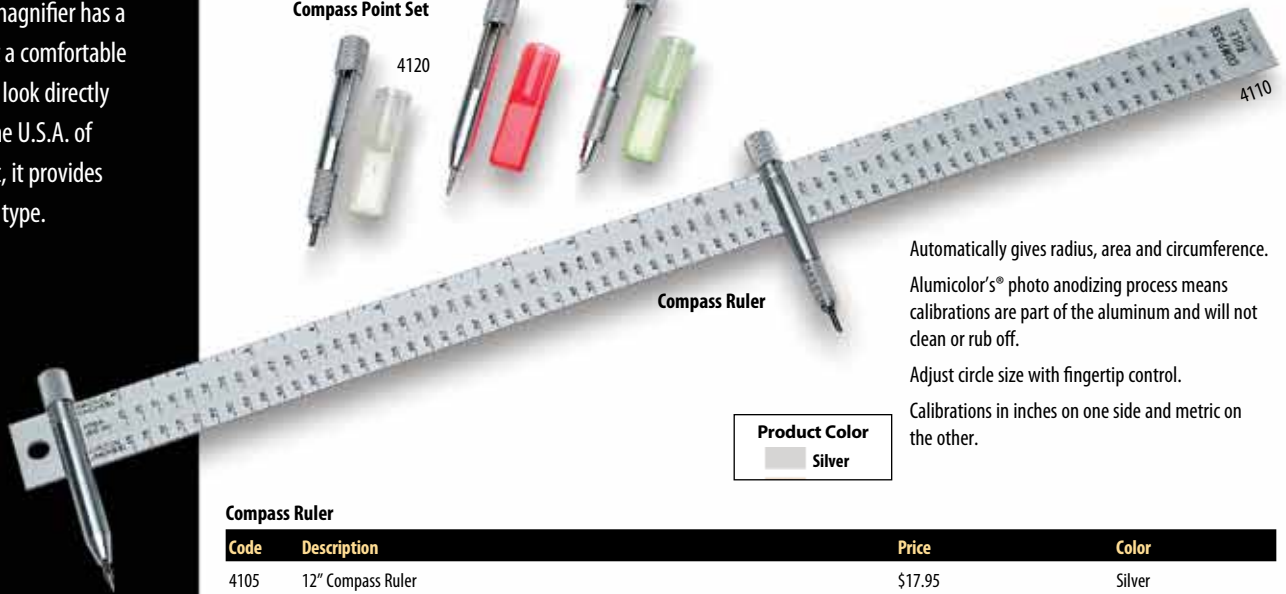

Magnifying Ruler

Compass Point Set

4120

Compass Ruler

Automatically gives radius, area and circumference. Alumicolor's® photo anodizing process means calibrations are part of the aluminum and will not clean or rub off. Adjust circle size with fingertip control. Calibrations in inches on one side and metric on the other.

Alumicolor's® **Pica/Point Ruler** is ideal for printing and layout professionals. Calibrated with inches and picas on one side and centimeters and points on the other.

Alumicolor's® **Layout Ruler** is great for students or graphic professionals. Calibrations include inches, picas (with standard newspaper columns widths), type point sizes and rule widths.

Alumicolor's® **Conversion Ruler** is a handy multi-purpose 12" straight-edge with inches and centimeters on front and metric conversions on back for linear, area, volume/ capacity and mass/weight measures.

Introducing Alumicolor's newest educational rulers. The **Presidents Ruler** features the nation's presidents and the year in which they were inaugurated. Our **State's & Capitals Ruler** display America's Fifty States and their Capitals. These products feature a standard inches/cm ruler on the front, making them a great multi-use tool for elementary and secondary schools.

Alumicolor® L-Squares, Vary Form Curve and 36" Yardstick

Alumicolor's® **L-Squares** are great for anyone in the fashion or graphic design industries. This product is a nice complement to our Vary Form Curve. Made from tempered aluminum. Calibrated on both the inside and outside edges and on the front and back for left and right-handed use. Available in two sizes, silver only.

The Alumicolor® **Vary Form Curve** is a fashion design tool used for pattern making. This product is calibrated on both sides and along both edges to give you even more contours. The quality Photo-Anodized finish makes the calibrations a permanent part of the aluminum.

The Alumicolor® **36" Yardstick** is a universal yardstick that has additional features that make it a useful tool in the sewing/quilting market. The yardstick features yardage increments as well as traditional inches and centimeters. Lightweight, low-priced and sturdy, this tool is a great value.

Alumicolor® Standard and Non-Slip Standard Straight Edges

Alumicolor's® **Standard Straight Edge** has a smooth photoanodized surface with a traditional ruler on one side featuring inches and CM's. Unlike other straight edges, Alumicolor's version has a bonus feature of a Center Finding ruler on the back. This gives the user two rulers for the price of one!

The Alumicolor® **Non-Slip Standard Straight Edge** has a neoprene non-slip backing that grips better than cork and does not dry out or chip off. Ultra smooth edges and photo anodized calibrations make this ideal for inking and cutting against. More rigid than thin steel versions.

The Alumicolor® **Non-Slip Center-Finding Straight Edge** has non-slip backing plus center-finding calibrations on the front for finding the center of a product quickly and easily.

Alumicolor® AlumiCutters™ and AlumiCrafters™

The **AlumiCutter™** is a multi-functional tool that's great for measuring, cutting and other craft applications. Its innovative raised edge and finger groove protect fingers while cutting with a hobby knife or rotary knife. The recessed neoprene non-slip backing keeps the AlumiCutter in the desired position with just a light touch. Made from extruded aluminum with photo-anodized calibrations, this high quality piece will last forever. Also available in a Steel Edge version for heavy duty cutting purposes. Choose from 7 different colors!

The **AlumiCrafter™** is a scrapbooker's dream come true. It can be used to measure, cut plus tear all in one! Additionally, the AlumiCrafter's unique deckle edge with center-finding calibrations makes a beautiful natural-looking border. Comes with the popular AlumiCutter's cutting edge, raised edge and finger groove for protecting your fingers while cutting. The neoprene non-slip backing keeps the product in place easily during use. Choose from 7 different colors!

ALUMICOLOR[®]
PRECISION TOOLS

“Should’ve Used Alumicolor”

Alumicolor has spent over 30 years building a reputation for high-quality precision tools. We understand that our customers expect a product that will hold up to everyday use while aiding them in their work. Our high-quality extruded aluminum and the photo anodizing process that makes our calibrations and colors permanent parts of the metal, assures them of that. More importantly, our customers expect their rulers to be accurate. Disturbingly, that’s not the case with many manufacturers who mass produce rulers that are often inaccurate. To them being off 1/16” is “close enough.” Well at Alumicolor, “close enough” isn’t good enough. We understand that being 1/16” off on a scale can mean the difference between a building that stands and one that falls down. We check the accuracy of our calibrations with a ruler certified as accurate by the U.S. Department of Commerce’s National Institute of Standards and Technology (NIST). So, you can be assured that the ruler you use for drafting and other projects is accurate and will provide you with high quality results. Unlike you, others who continue to use inferior products will find themselves saying, *“Should’ve Used Alumicolor!”*
