Custom Imprinting on Alumaticolor Products	
Most Alumaticolor products can be custom imprinted with your company's information for self-promotion giveaways or private label sales. We can also imprint information for YOUR customers' organizations – giving you an opportunity to sell large quantities of customized promotional products to your clients. Normal production time is 10-20 days from art approval. There is a minimum of 50 pieces of each product/color. Please call our customer service department for details at 1-800-624-9379. See page 22.

Distributor and Store Orders Alumaticolor® Quality

- Minimum order \$100.00 Net (no minimum per item).
- Orders under \$500.00 Net are F.O.B. Fort Collins, CO 80524.
- Orders over \$500.00 Net receive free ground freight in the Continental United States.
- Free freight for standard and BTS orders does NOT APPLY to CANADIAN shipments.
- Orders will usually be shipped complete within 5 working days.
- All products are packaged for display with UPC codes.
- Substitutions for another color may be made for out-of-stock items.
- Items may be back ordered unless arranged in advance.
- Prior authorization is required for all returns.
- Claims for shortages must be made within 3 days of receipt.
- Prices are subject to change without notice.
- Net 30 day terms are available with approved credit.
- \$30.00 returned check fee may be applied.

Alumaticolor® Quality

Alumaticolor® products are made from the highest quality extruded aluminum. The extrusion process creates rulers and scales with smooth edges to exact specifications. The Alumaticolor® photo anodizing process makes the finish, the color and the calibrations a permanent part of the aluminum. Calibrations are resistant to cleaners or solvents. The anodizing process also means no ticks, raised surfaces or grooves to interfere with the creation of accurate plans, drawings and other precision work.

Our quality control department is dedicated to producing the most accurate rulers in the Art Materials market to insure that scale drawings are truly to scale. For more information about our industry leading accuracy please refer to the back cover of this catalog.

Alumaticolor® products are made in El Salvador and assembled and distributed in the U.S.A. Magnifying Rulers are made in Taiwan.

Wood Acrylic T-Squares and Stainless Steel Rulers are made in China.

Introducing our newest line of drafting tools: The Frank Lloyd Wright Collection

Frank Lloyd Wright (1867-1959) is recognized worldwide as one of the greatest architects of the twentieth century. His work heralded a new thinking in architecture, using innovation in design and engineering made possible by newly developed technology and materials.

Now Alumicolor, the leader in precision drafting tools, has teamed up with the Frank Lloyd Wright Foundation to bring you these creative and innovative signature Wright products each featuring a Frank Lloyd Wright quote or design to inspire you.

DRAFTING PRODUCTS

Alumicolor® AlumiDrafter™

The **AlumiDrafter™** is the newest addition to Alumicolor's long line of innovative drafting products. Invented by a practicing architect, this multi-use tool gives the user all the advantages of a traditional triangular scale in addition to many other features while solving the portability problem of it's bulkier counterpart. See below for all the features of this unique new tool for the architect and engineer industry.

4 Tools in 1

Measure & Scale Drawings

Draw Circles & Arcs

Draw Angles & Triangles

Use as a Cutting Edge

Best Seller!

Alumicolor® 6" & 15cm **Pocket Scales** are a smaller version of the 12" professional solid scale. The pen-size, light weight design provides professionals and students with a scale that can be taken anywhere. Architect, Engineering and Combination versions are also available with clip.

Use our Point of Purchase display to increase your sales of these best sellers. Our display holds 35 scales and can either be used on a counter top or can be hung from peg board. Choose the standard option of a mix of our most popular colors of Architect, Engineer and Combination scales or choose your own mix.

DRAFTING PRODUCTS

Alumicolor® Solid and Color Coded Drafting Scales

Alumicolor® scales are made from extruded aluminum with photo anodized calibrations that resist wear or being removed with solvents.

Solid Scales have an executive look and feel and are widely used by drafting professionals. Our standard Architect and Engineer versions are now available in all seven colors we offer.

Color Coded Solid Drafting Scales have a different color-coded groove on each side (red, green, & blue) to help you easily find your most frequently used calibrations.

Alumicolor® Select-a-Scale and Drafting Fan

Alumicolor® **Select-a-Scales** are an ultra convenient and functional drafting tool that allows architects and engineers to select multiple scales all in one product.

The unique design incorporates a sculptured arch on the bottom for ease of movement. A rotating rod on the top displays one of six available scales while the solid aluminum base has fixed scales on the front as well as a raised inking edge.

Made from extruded aluminum with calibrations added using Alumicolor's photo anodizing process.

The Alumicolor® Drafting Fan

is another convenient all-in-one tool made from aluminum that has all standard Architect, Engineer and Metric scales used in the industry. 8 blades of aluminum sheet, riveted together giving you a compact tool with everything you need!

DRAFTING PRODUCTS

Alumicolor® Architect and Engineer 4-Bevel and Straight Edge Scales

Alumicolor® Architect and Engineer 4 **Bevel Scales** are precision measuring and drawing devices. Alumicolor's® photo anodizing process makes the calibrations a part of the aluminum providing a smooth, tick-free finish and markings that will resist wear and rubbing off.

Alumicolor® **Straight Edge Scales** are designed to carry in folders, notebooks or day-timers. An economical, high quality alternative to the 4 Bevel Scales.

Alumicolor® Architect **Joist/Truss Scales** are accurate, quality 4 bevel scales that will be a BIG hit with architects, builders, roofers, framers and lumber yards.

Based on customer needs, we are offering two different versions. Use the (1", 1/2") scales for measuring large scale drafting plans, whereas the (3/16", 3/32") scales are used more frequently for measuring reduced plans. Both versions come with (1/4", 1/8") scales.

Alumicolor® Standard and Non-Slip Standard T-Squares

Alumicolor's® Standard

T-Squares have a 1-1/2" tempered aluminum shaft which is calibrated in inches and centimeters.

The black ABS plastic heads are lightweight and nearly unbreakable. The heads are secured with 5 screws instead of rivets. Available in a wide range of sizes.

The aluminum shaft is made in El Salvador and plastic head is made in the U.S.A. Assembled in the U.S.A.

Alumicolor® Non-Slip Standard

T-Squares have the same features of the Standard T-Squares. The Non-Slip T-Square has a neoprene non-slip backing that grips better than cork and will not dry out or chip off.

Alumicolor® has a full line of **Professional T-Squares** with a 2" wide extruded aluminum blade. Calibrations are made using Alumicolor's® photo anodizing process giving all our products a smooth, tick-free finish that will not wear.

Alumicolor® **Steel Edge Professional T-Squares** have dual stainless steel cutting/inking edges embedded in tempered aluminum shaft for heavy duty use. Alumicolor® **Non-Slip Professional T-squares** feature a neoprene non-slip backing that grips better than cork and will not dry out or chip off. All of our T-squares are calibrated in inches and centimeters.

DRAFTING PRODUCTS

Alumicolor® Standard and Professional Drafting Sets

Alumicolor's® **Architect and Engineer Drafting Sets** combine key products in one easy-to-purchase, cost-effective package. All products are made from solid aluminum and calibrations are photo anodized. The anodizing process makes all markings a permanent part of the aluminum giving each product a smooth, tick-free finish that resists wear. A "must have" for students or professionals!

Standard Drafting Set:

- 24" Standard T-Square** - 1-1/2" tempered aluminum shaft with black ABS plastic head secured with 5 screws instead of rivets
- 12" Hollow Architect or Engineer Scale** - lightweight for easy portability
- 6" Pocket Architect or Engineer Scale** - pen-size scale that can be taken anywhere

Engineering versions now available

Alumicolor® Wood Acrylic T-squares with Calibrated Edges & Pica/Point T-squares

**Added Value!
Calibrated Edges!**

detail of calibrated edges with inches and centimeters

Alumicolor® introduces the exclusive Calibrated Wood/Acrylic T-Square. The classic look of the traditional wood/acrylic T-Square now has calibrated edges offering you easy and precise measurements in inches and centimeters. Our calibrated wood/acrylic blade is permanently fastened to the large wooden head, providing lasting accuracy.

They are available in:

18", 24" and 36" sizes.

Alumicolor® L-Squares, Vary Form Curve and 36" Yardstick

Alumicolor's® **L-Squares** are great for anyone in the fashion or graphic design industries. This product is a nice complement to our Vary Form Curve. Made from tempered aluminum. Calibrated on both the inside and outside edges and on the front and back for left and right-handed use. Available in two sizes, silver only.

The Alumicolor® **Vary Form Curve** is a fashion design tool used for pattern making. This product is calibrated on both sides and along both edges to give you even more contours. The quality Photo-Anodized finish makes the calibrations a permanent part of the aluminum.

The Alumicolor® **36" Yardstick** is a universal yardstick that has additional features that make it a useful tool in the sewing/quilting market. The yardstick features yardage increments as well as traditional inches and centimeters. Lightweight, low-priced and sturdy, this tool is a great value.

SPECIALTY RULERS

Alumicolor® Compass Ruler, Compass Point Sets, Magnifying Ruler & Stainless Steel Rulers

Alumicolor® offers **Compass Rulers** in 12" and 18" sizes. Compass Ruler sets include the shaft, anchor point, lead holder and lead all in one package. Make circles up to 24" with the 12" set or 36" with the 18" set.

As an alternative to the Compass Ruler, Alumicolor® also offers **Compass Point Sets** for use with your existing Alumicolor ruler or yardstick. Compass Point Sets include the anchor point, lead holder and lead for drawing circles, and a rotary knife for cutting circles. The straight edge size fit 6" to 24" rulers, code 1589 through 1594. The yard stick size fits 30" to 48" rulers, codes 1595 through 1598.

The 2-bevel **Magnifying Ruler** is calibrated in inches and centimeters with a 2X magnifier. The magnifier has a raised curve for viewing at a comfortable angle instead of having to look directly straight down. Made of a rigid, high-quality plastic, it provides excellent viewing of small type.

Alumicolor® flexible **Stainless Steel Rulers** are an essential item for any artist or draftsman. Their non-slip cork backing adds value and functionality.

SPECIALTY RULERS

Alumicolor® Graphics and Educational Rulers

Alumicolor's® **Pica/Point Ruler** is ideal for printing and layout professionals. Calibrated with inches and picas on one side and centimeters and points on the other.

Alumicolor's® **Layout Ruler** is great for students or graphic professionals. Calibrations include inches, picas (with standard newspaper columns widths), type point sizes and rule widths.

Alumicolor's® **Conversion Ruler** is a handy multi-purpose 12" straight-edge with inches and centimeters on front and metric conversions on back for linear, area, volume/capacity and mass/weight measures.

The **Presidents' Ruler** features the nation's presidents and the year in which they were inaugurated. Our **State's & Capitals Ruler** display America's Fifty States and their Capitals. These products feature a standard inches/cm ruler on the front, making them a great multi-use tool for elementary and secondary schools.

OFFICE AND CRAFT PRODUCTS

Alumicolor® AlumiCutters™, AlumiCrafters™ and Cut & Measure Sets

The **AlumiCutter™** is a multi-functional tool that's great for measuring, cutting and other craft applications. Its innovative raised edge and finger groove protect fingers while cutting with a hobby knife or rotary knife. The recessed neoprene non-slip backing keeps the AlumiCutter in the desired position with just a light touch. Made from extruded aluminum with photo anodized calibrations, this high quality piece will last forever. Also available in a Steel Edge version for heavy duty cutting purposes. Choose from 7 different colors!

The **AlumiCrafter™** is a scrapbooker's dream come true. It can be used to measure, cut and tear all in one! Additionally, the AlumiCrafter's unique deckle edge with center-finding calibrations makes a beautiful natural-looking border. Comes with the popular AlumiCutter's cutting edge, raised edge and finger groove for protecting your fingers while cutting. The neoprene non-slip backing keeps the product in place easily during use. Choose from 7 different colors!

Alumicolor® Center-Finder and Non-Slip Straight Edges

Alumicolor's® **Standard Straight Edge** has a smooth photoanodized surface with a traditional ruler on one side featuring inches and CM's. Unlike other straight edges, Alumicolor's version has a bonus feature of a Center Finding ruler on the back. This gives the user two rulers for the price of one!

The Alumicolor® **Non-Slip Standard Straight Edge** has a neoprene non-slip backing that grips better than cork and does not dry out or chip off. Ultra smooth edges and photo anodized calibrations make this ideal for inking and cutting against. More rigid than thin steel versions.

The Alumicolor® **Non-Slip Center-Finding Straight Edge** has non-slip backing, plus center-finding calibrations on the front for finding the center point of any item quickly and easily.

Alumicolor® Custom Imprinting Information

Custom Imprint Program

Because Alumicolor owns its own factory, we are in the unique position to offer customization of any of our products. Whether it's a **Private Label** line to increase your company's brand awareness or a custom imprinted **corporate promotional product** for your corporate clients, Alumicolor can provide you with effective, quality products at low minimum quantities.

PRIVATE LABEL

PRIVATE LABEL (product imprinted with your store's logo)

- Minimum order: 50 pieces per SKU
- Pricing: 10% upcharge over normal store discount. No setup charges.
- Imprint: Pricing includes 1 color / 1 location imprint. Imprint method is photo anodizing which makes the logo and color a permanent part of the aluminum so it will never fade or rub off.
- Artwork: Alumicolor will create art proofs for your review before production. Vector art is required (AI, EPS, vector PDF, or CDR file formats). Email art files to artwork@alumicolor.com.
- Production Time: Please allow 3-4 weeks for delivery after art approval.

CORPORATE PROMOTIONAL PRODUCTS

CORPORATE PROMOTIONAL PRODUCTS

(products your corporate customers can use for gifts and tradeshow giveaways)

- Minimum order: 100 pieces
- Pricing: Call Alumicolor for quotes, as pricing varies depending on the item and quantity ordered. Quantity prices breaks at 100, 250, 500 & 1,000 pieces. Call toll free at 1-800- 624-9379.
- Imprint: Pricing includes 1 color / 1 location imprint. Imprint method is photo anodizing which makes the logo and color a permanent part of the aluminum so it will never fade or rub off.
- Artwork: Alumicolor will create art proofs for your review before production. Vector art is required (AI, EPS, vector PDF, or CDR file formats). Email art files to artwork@alumicolor.com.
- Production Time: Please allow 3-4 weeks for delivery after art approval.

Ludwig Precision Quality

At Ludwig Precision, we take pride in the quality and dependability of each of our products. We use high-quality extruded aluminum, cut to exact specifications, as well as precise imprinting techniques to create tools that you can trust. Our unique edge to edge calibrations and large numbers make for fast and easy length-of-item measurements. The 32nds calibrations for the first 6 inches on all our products help give accurate measurements of even the smallest items. Finally, the English and Metric calibrations allow for flexible use in any situation.

Although our products are targeted primarily for use in the scholastic and hobby markets, their precision also makes them a favorite among drafting professionals. So you can be assured that when you buy a Ludwig Precision product, you're getting the very best.

SCHOLASTIC DRAFTING TRIANGLES

30°/60°/90°
Triangles

45°/90°
Triangles

Ludwig Precision Calibrated Aluminum Drafting Triangles are made of lightweight, durable aluminum, making them ideal tools for both the classroom and professionals in the field.

These triangles feature English and Metric calibrations, as well as hole template sizes up to 1" in diameter. The edges are calibrated to 32nds along the entire English edge, and all holes are accurately calibrated and labeled for convenience.

Pair these triangles with one of our T-Square products for the perfect kit for all your drafting and drawing needs!

SCHOLASTIC T-SQUARES

Economically priced for student kits

Ludwig Precision Scholastic T-Squares are a terrific choice for the art or drafting student. Scholastic T-squares are made from extruded aluminum and feature a 1.5" wide x 1.6mm thick blade that is conveniently calibrated in both inches and centimeters. The first 6" along the top edge are calibrated to 32nds of inch for detailed measurements. These T-squares have a solid, high quality plastic head.

Imprinting On Ludwig Precision Products

Ludwig Precision products are an excellent way to promote your business, organization or other group. All Ludwig Precision products can be imprinted with your company information, names, logos and contact information. This is a great way for you to promote your company or event.

Our items can also be PRIVATE LABELED so you could carry your own line of products. Another great benefit of our custom imprinting process is that you can offer these imprinted items to your customer. We can custom imprint your customers information onto our products allowing you to open up a world of money making opportunities by selling large quantities of customized items to your clients.

Please contact our customer service department for more detailed information.

6" Ludwig Center-Finding Straight Edge is 1.125" wide. All other Ludwig Center-Finding Straight Edges are 1.75" wide.

Ludwig Precision Standard Scholastic Straight Edges feature English and Metric measurements, as well as edge-to-edge calibrations for easy length-of-item measurements.

Ludwig Precision's Center-Finding Straight Edge helps users quickly center items on any background. These items also feature calibrations out to 32nds of an inch for exact center location measurements.

"Should've used Alumicolor"

Alumicolor® has spent over 40 years building a reputation for high-quality precision tools. We understand that our customers expect a product that will hold up to everyday use while aiding them in their work. Our high-quality extruded aluminum and the photo anodizing process that makes our calibrations and colors permanent parts of the metal, assures them of that.

More importantly, our customers expect their rulers to be accurate. Disturbingly, that's not the case with many manufacturers who mass produce rulers that are often inaccurate. To them, being off by 1/16" is "close enough." Well, at Alumicolor, "close enough" isn't good enough. We understand that being 1/16" off on a scale can mean the difference between a building that stands and one that falls. We check the accuracy of our calibrations with a U.S. Department of Commerce's National Institute of Standards and Technology (NIST) certified ruler. So, you can be assured that the ruler you use for drafting and other projects is accurate and will provide you with high quality results.

Unlike our loyal customers, others who continue to use inferior products will find themselves saying, "Should've Used Alumicolor!"
